THE BENEFITS OF COLLABORATING WITH OUR PARKS

Our residents and partners take advantage of a world-class combination of infrastructure, value-added services, living space and community engagement.

The European Space Academy (ESA) and Paul Scherrer Institute (PSI) inaugurates the European Space Deep-Tech Innovation Centre (ESDI) at Switzerland Innovation Park Innovaare to drive quantum, materials and data in Europe.

“The inauguration of the European Space Deep-Tech Innovation Centre is a testimonial to ESA’s and Switzerland’s joint commitment to push innovation and drive economic growth. ESDI will contribute to strengthening the European deep tech ecosystem and promoting Swiss and European leadership in this domain.”

Dr Josef Aschbacher
Director General, ESA

Engimmune and the Swiss Center for Electronics and Microtechnology (CSEM) use AI and microfluidics to accelerate discovery of safe, targeted TCR-based cancer treatments.

“The fact that motivated us to collaborate in addition to the obvious technological synergies, was proximity. We are here in the same location at Main Campus HQ of the Switzerland Innovation Park Basel Area. We had some previous interactions in the past, but this project was born out of our proximity, interaction and discussion.”

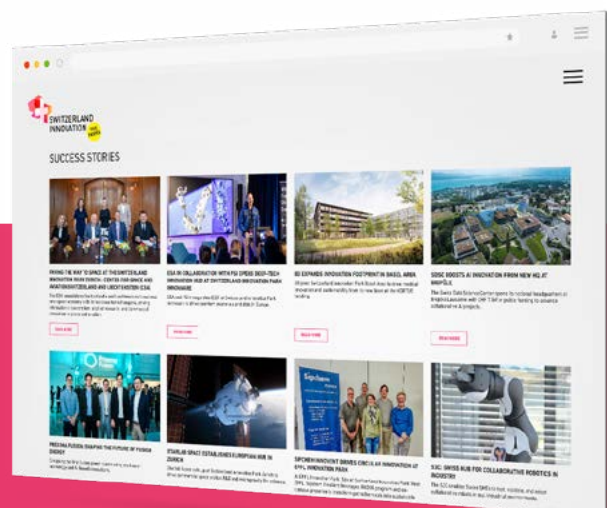

Rodrigo Vazquez-Lombardi
Co-founder and CSO, Engimmune Therapeutics

At EPFL Innovation Park, Site of Switzerland Innovation Park West EPFL, Sipchem InnoVent leverages KNOVA program and on-campus presence to transform petrochemicals into sustainable polymers.

“The progress we’ve made over the past three years is significant, and the EPFL environment will remain a powerful growth driver for us.”

Éric Bouchardy
General Manager, Sipchem InnoVent
